SEXUAL ASSAULT

**The CDC has sounded the alarm that our children are suffering.** Increasing exposure to violence and trauma are being reflected in their plummeting self esteem as increasing numbers of children and teens report experiencing anxiety, depression, and feelings of hopelessness resulting in self harm and/or harm to others. What can we do about it?"

Join us for an engaging panel discussion to learn more about steps you can take to be proactive in protecting and empowering all of our children and teens.
